Operational AI Agent for Outbound Optimization

An AI-Powered Lead Generation System designed to autonomously optimize outbound performance

Core Agent Capabilities

- *Autonomy – Decides the best strategy for each interaction*
- *Memory – Retains lead, campaign, and interaction context*
- *Learning – Continuously improves from performance data*
- *Action – Executes outbound workflows independently*

Lead Extraction

Identifies and qualifies high-value prospects

Email Generation

Creates personalized, context-aware outbound messaging

Feedback Learning Loop

Analyzes engagement data and optimizes targeting & messaging

Go-Live Plan & Timeline

Operational Performance KPIs

- SLA-based response times
- Monthly performance review
- Optimization recommendations
- Prompt & targeting refinements
- Strategic growth advisory

4K + licences

Pricing & Partnership Structure

There is the possibility of reselling the product as a white label or under our own brand name.

The deployment to the third party will be handled by Miraki, and will keep the upfront payment. The fee will be split based on the agreed-upon terms.

Reselling Options

- Special licensing terms for partners
- Multi-client deployment rights
- Volume-based commercial conditions

ANNEX

Lead Extraction

Purpose: Build a clean, high-quality, prioritized lead pipeline

Email Generation

Purpose: Generate high-performing, customized outbound messaging

Feedback Learning Loop

Purpose: Transform engagement data into optimization actions

Technical Stack

Data Sources & Lead Intelligence

- Google Drive – External CSV storage & structured data intake
- Apollo – Lead sourcing & prospecting database
- HubSpot – CRM integration & lifecycle synchronization
- Clay – Advanced data enrichment

Deliverability & Outreach Infrastructure

- NeverBounce – Email verification & bounce prevention
- Instantly – Outbound email sequencing & campaign execution

Data Infrastructure & Backend

- Supabase – Database, storage & backend services
- OpenAI – AI reasoning, generation & optimization engine
- N8N - Orchestration
- Hostinger - VPN Administrator

Ownership & Delivery Model

Tool Ownership & Costs

- All required platforms and software licenses will be owned by the Client
- The Client assumes all costs related to third-party tools and infrastructure
- Access credentials and administrative permissions must be provided

Development & Deployment Model

- Option A — Develop & Transfer
 - Built in our environment
 - Final deployment in Client infrastructure
- Option B — Direct Client Environment Build
 - Developed directly within Client's infrastructure
 - Immediate integration with internal systems

Contractual & Governance

- Scope, SLAs, and responsibilities defined upon agreement
- Data ownership remains with the Client
- Confidentiality and data protection terms formalized at contract stage
